

Meyenberg Goat Milk Products Manufactured for Human Consumption

Reference: Material Safety Data Sheet

Meyenberg Goat Milk products are food products and manufactured in accordance to the California State Department Of Food and Agriculture Bureau of Milk and Dairy Foods Control. They are also under the inspection of the Federal Food and Drug Administration.

Products include Evaporated Goats Milk, Powdered Whole Goats ~ Whole Goats Milk UHT, Low Fat Milk UHT, Goats Milk Butter, Goats Milk Cheddar Cheese, Goats Milk J ad: Cheese.

These dairy products are exempt from the labeling requirements of the OSHA Hazard Communication Standard since they are subject to Food and Drug Administration Labeling requirements.

Meyenberg Goat Milk Products are not classified as Hazardous Chemicals, thus making it unnecessary to provide Material Safety Data Sheets to downstream purchasers.

In certain limited circumstances, some powdered dairy products may be considered a Physical Hazard because of physical properties of the powder itself - particularly with particles of less than 100 microns in diameter. With particles of 100 microns or less theoretically could explode if exposed to an ignition source.
