VegeCide

DEFINITION

A 100% natural composition of high purity, renewable vegetable sourced, esters of monocaprylic (C18) and monoundecylenic (C11) acids.

FULL INCI

Glyceryl Monocaprylate (and) Glyceryl Monoundecylenate

DESCRIPTION

Monocaprylic Acid is well know for its activity against bacteria and yeast.

Monoundecylenic Acid is well know for its activity against fungus.

The combination of the two offers remarkable broad spectrum preservation activity for natural, and preservative free, claims in all cosmetic applications.

VegeCide is truly **multi-functional** allowing the formulator to create products utilizing fewer ingredients and a **greener** product, it's not just a preservative. The fatty acid backbone also contributes...

ATTRIBUTES

- effective moisture barrier to prevent TEWL (trans epidermal water loss / moisture retention
 - emulsion stability enhancement / co-emulsifier
 - replenishment of the healthy structural environment through skin re-fatting
 - oil soluble / perfect for all of your anhydrous products
 - petro chemical free
-
